

Supplementary Figure S1. Successful transient transfection of CRC cells with miR-433. (a) The relative expression of miR-433-3p after SW480, SW620, LoVo and RKO cells were transfected with an miR-433-3p mimics or inhibitor. (b) The expression changes in CREB1, CCAR1 and JNK1 after cell transfection. NC, negative control; mimics, miR-433 mimics; inhibitor NC, negative control for inhibitor; inhibitor, inhibitor of miR-433. *, $p < 0.05$; **, $p < 0.01$; ***, $p < 0.001$.
